

INTRODUCTION

DOCUMENT TITLE

The title of this document is "Manual of Standards and Specifications for Wastewater and Water Main Construction in the City of Ocoee." Other documents that will supplement this document as they are adopted or revised include the City of Ocoee Road Construction Specifications, the City of Ocoee Subdivision Regulations, and the City of Ocoee Right-of-Way Utilization Regulations.

JURISDICTION

This MANUAL shall apply to all proposed water and wastewater facilities to be owned, operated or maintained by the City of Ocoee.

PURPOSE

These standards and specifications are adopted to establish minimum acceptable standards for the design and construction of water distribution and transmission facilities and wastewater collection and transmission facilities in the City of Ocoee. Such facilities include water mains, gravity sewers, wastewater force mains, wastewater pump stations, and miscellaneous related appurtenances associated with such systems.

SCOPE

This Document is divided into three parts. Part 1 - Standards includes Divisions I and II. Division I presents general requirements governing review and approval of plans, and construction inspection and acceptance. Division II presents design standards for wastewater and water main facilities.

Part 2 of this document, Specifications, includes Division III, IV and V. These three Divisions contain detailed technical specifications governing construction of water and wastewater mains facilities in the City of Ocoee.

Part 3 of this document is Standard Drawings. This part contains Drawings showing standard details associated with the installation of wastewater and water main facilities.
