

## City of Ocoee Showerhead Exchange Program

The City of Ocoee Utilities Department and the POWR Program would like to introduce the "Showerhead Exchange Program". Residents must bring their old showerhead to exchange it for a high efficiency one. Up to two (2) showerheads may be exchanged per household, per year, while supplies last.

- Showerheads are Earth® Massage brand, 1.5 GPM Chrome
- Flow control technology: greater force at lower flow!
- Conserves water and saves money while enhancing pressure, performance and appearance!
- 9-jet turbo massage is adjustable: gentle needle spray to forceful jet
- Consistent flow rate regardless of water pressure
- Saves 40% more water and energy than a standard 2.5 GPM showerhead - that's 7,300 gallons of water annually!
- Non-aerating spray means less temperature loss
- Self-cleaning and maintenance-free
- Installs easily by hand and without tools
- Chrome-plated finish
- Corrosion-resistant, high-impact ABS thermoplastic body
- A WaterSmart product

### Visit a showerhead exchange location:

- Utility Billing Counter at City Hall – 150 N. Lakeshore Drive
- Utilities Administration Building – 1800 A.D. Mims Road

### Make sure you bring:

- Your old showerhead(s)
- Proof of residency

Showers are typically responsible for about 30% of a household's water consumption. By removing an inefficient showerhead and installing a water efficient one, you can cut your water use by two-thirds. If you go a step further and keep your shower under five minutes, you will save even more water. Ensuring your home has an efficient showerhead in each bathroom is one of the easiest ways to save water and reduce your water and energy bills.
